February Program

Topic: “Sumps in the Aquarium Hobby”

The newest addition to the aquarium filtration system. How freshwater sumps operate and how they are set up. How saltwater sumps operate and how they are set up. The pro's and con's to having a sump vs other more conventional filtration systems. See if this new approach to aquarium filtration is right for you.

Matt Joly will be the guest speaker for this interesting and informative presentation. Matt is an expert in tropical and marine fish keeping and has aquariums over 500 gallons in size. He currently works at Concept Aquarium and is one of the main aquarium designers.

Come spend an evening with Matt and the movement to sumps in the aquarium. Matt will answer questions you may have with regards to sumps and other related issues.

Look forward to seeing you there!
